

THREE CARD BACCARAT

Three Card Baccarat™ features head-to-head play against the dealer and the optional King's Bonus, Dragon Bonus and Tie side bets.

GETTING STARTED

Make your standard Three Card Baccarat wager, and one, two or all three of the side bets. Once all wagers have been placed, the dealer will deal each player and himself three cards. You win if your hand has a higher point total than the dealer's hand. Scoring is the same as in standard baccarat: Aces count as one, 2-9 count as their face value and 10-value cards count as zero. In the event the total exceeds 10 points, the 10-Column is eliminated. For example, if the player's cards are 10-4-8, the total value is two points.

WINNING AND LOSING

Beat the dealer's three card point total and your Three Card Baccarat wager wins 1 to 1". If your three card point total is less than the dealer's point total your Three Card Baccarat wager will lose. If you and the dealer have identical point totals, the winner will be determined by who has more face cards. Example: if the player has 8-K-J(eight points) and the dealer has 2-5-A the player wins.

Note: Your Kings Bonus (if available) bet wins if your three card hand contains one of the listed payouts. See payable for odds. Your Dragon Bonus (if available) wager is paid if your Three Card Baccarat hand beats the dealer's Three Card Baccarat hand by 5 or more points. See payable for odds.

While point totals dictate the higher hand, there is one exception: a hand consisting of three kings is the highest-ranking hand. A hand consisting of three face cards (Jacks, Queens or Kings, in any combination) is the second highest hand.
